

Prop Firm RealityCheck Report

Generated from your trading history · Candor

CANDOR REALITYCHECK	Prop Firm RealityCheck · Lantern Scan Complete
BEST MATCHING RULESET	EOD-style ruleset · 69.9% · Strong fit
KILLER RULE	Trailing drawdown
CONFIDENCE	Medium
REPORT ID	CND-TEST-001

How to read the risk labels

Strong Fit: this uploaded history showed stronger fit with this ruleset in simulation. **Borderline:** this uploaded history produced mixed results under this ruleset. **High Mismatch:** this uploaded history showed high mismatch or high retry-risk under this ruleset.

Labels describe simulation behavior of the uploaded history only — not a forecast, not advice, not a guarantee.

Your data

Report ID: CND-TEST-001
Ruleset version: RULESET-2026-06-05
Simulation date: 2026-06-11 · Confidence: Medium
Trades read: 63 · Trading days: 28 · Profitable days: 15

When your challenge ends

Help Candor measure its own predictions: when this challenge resolves, submit your real outcome (passed / failed / not attempted) quoting Report ID **CND-TEST-001**. We publish calibration once enough verified outcomes are in — we don't hide from our predictions.

What to do with this report

This report is a snapshot of the uploaded history and the ruleset version shown above. If your risk settings, trade behavior, instrument mix, or a public ruleset changes, rerun the RealityCheck with updated data.

Common reasons to rerun:

- You changed position sizing
- You added 30+ new trades
- You switched instruments
- A public challenge rule changed
- Your drawdown pattern changed

Next steps: Rerun after new data · Compare another mode · Submit your outcome later.

Testing different risk settings? A 3-report bundle lets you compare scenarios without starting from scratch.

Mini glossary

Trailing drawdown: A drawdown limit that can move as account equity rises.

EOD drawdown: A drawdown calculation based on end-of-day equity rather than every intraday tick.

Daily loss limit: The maximum loss allowed within a trading day under a ruleset.

Retry loop: The repeated cost of buying or restarting challenges after failure.

Fee burn: The estimated cost pressure created by low pass odds and repeated attempts.

Risk DNA: Behavioral risk patterns detected from your uploaded history.

Killer rule: The rule most often associated with failure in simulation.

Killer behavior: The trading behavior most associated with drawdown pressure in your uploaded history.

Confidence: A data-quality label based on trade count, trading days, and available fields.

Honesty & disclaimer

Not financial advice. Test disclaimer.

Some rulesets are seed data pending verification, and trailing/intraday drawdown is approximated from end-of-day balances. These limits are intentional and disclosed, not hidden.
